

Brixton Metals Corporation is focused on the discovery, exploration and development of silver, gold and copper projects within the America's to feasibility.

Brixton wholly owns four (4) projects in Canada and the USA:

- The Thorn Copper-Gold-Silver Project in British Columbia;
- The Atlin Goldfields (Gold) Project in British Columbia;
- The Hog Heaven Silver-Gold-Copper Project in Montana;
- The Langis-Hudson Bay Silver-Cobalt Project in Northeastern Ontario.

We are seeking a Senior Geologist to fill a full-time position responsible for planning and leading the Company's geological exploration programs. The incumbent will work from our office in downtown Vancouver and on-site.

Job Description

Our ideal candidate is a dynamic, highly motivated and experienced exploration geologist with a strong geological modeling background. As a key leader of the geological team and mentor, the incumbent will be an integral part of the design, planning, execution and completion of geological work at all four of Brixton's exploration projects. The Senior Geologist will be a detail oriented, efficient and experienced manager.

Responsibilities:

- Lead geological modelling efforts across all of Brixton's projects;
- Manage and provide technical support to field exploration staff;
- Design, budget and execute field exploration programs;
- Work with management, team members, contractors and other stakeholders;
- Work and collaborate with local communities and First Nations;
- Promote the company's commitment to health, safety and sustainability.

Qualifications:

- A minimum of 15 years of mineral exploration experience across a range of ore deposit types;
- Strong leadership skills and effective collaborative qualities, as a significant part of the role involves leading and working with personnel in the office and in the field;
- Management experience of exploration projects with the ability to lead and have oversight of multiple projects simultaneously;
- Experience in the interpretation and modeling of geoscience datasets;
- Exceptional organizational and time management skills for managing personnel and multiple projects;

- Proficient in the use of Leapfrog 3D Geological Modelling software, ARGIS, and Microsoft Office Suite;
- Detail oriented with strong problemsolving skills;
- Accountable and dependable;
- Uphold a commitment to safety and attend all safety training;
- Minimum of B.Sc. in Geoscience or related field. Eligibility for enrollment as a Professional Geoscientist is required (M.Sc. or Ph.D. is considered an asset);
- Reside in Vancouver/Lower Mainland with the ability to attend work at Brixton's Vancouver (downtown) office and on-site at remote, seasonal camps (as required).

How to apply: Kindly forward your **CV with a cover letter** by email to: careers@brixtonmetals.com

Due to the volume of applications, only shortlisted applicants will be contacted. Thank you for your understanding.
