A MULTI GENERATIONAL OPPORTUNITY

INVESTOR PRESENTATION
MAY 2026

SAFE HARBOUR STATEMENT

Information set forth in this presentation involves forward-looking statements, including but not limited to comments regarding planned drilling and other exploration, identification of new targets, timelines, predictions and projections. Forward-looking statements are statements that relate to future, not past, events. In this context, forward-looking statements often address expected future business and financial performance, and often contain words such as “anticipate”, “believe”, “plan”, “estimate”, “expect”, and “intend”, statements that an action or event “may”, “might”, “could”, “should”, or “will” be taken or occur, or other similar expressions. By their nature, forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause our actual results, performance or achievements, or other future events, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Such factors include, among others, the following risks: the need for additional financing; operational risks associated with mineral exploration; fluctuations in commodity prices; title matters; and the additional risks identified on the Company’s website or other reports and filings with the TSX Venture Exchange and applicable Canadian securities regulators. Forward looking statements are based on the Company and its management’s good faith assumptions relating to the financial, market, regulatory and other relevant environments that will exist and affect the Company’s business and operations in the future. Forward-looking statements in this presentation are not guarantees or predictions of future performance. Forward-looking statements are made based on management’s beliefs, estimates and opinions on the date that statements are made, and the Company undertakes no obligation to update forward-looking statements if these beliefs, estimates and opinions or other circumstances should change, except as required by applicable securities laws. Investors are cautioned against attributing undue certainty to forward-looking statements. Certain images in this presentation have been generated using artificial intelligence or digitally altered for illustrative purposes only and do not represent actual geological conditions, mineralization, or exploration results: Cover, 6, 8, 10, Contact pages.

Mr. Gary R. Thompson, P. Geo., Chairman, President and CEO of Brixton, is the QP who approved the scientific and technical information in this Presentation.

OUR TEAM

GARY THOMPSON, P.Geo.
CHAIRMAN & CEO

- 30 years in resources including 19 years in public markets
- Founder of Brixton, founder and Chairman of Silver47, former Chairman of West Point Gold, sold Sierra Geothermal in 2010,
- Former geologist for NovaGold Resources, Newmont Alaska and Encana Corporation (now Cenovus Energy)
- Led equity financings totaling \$200M

IAN BALL
DIRECTOR

CALE MOODIE, BSF, CPA, CA
CFO & DIRECTOR

- Founder of Brixton, former CFO of Underworld Resources
- Founder & CEO of Neptune Digital Assets Corp
- 18 years in public markets
- Involved in \$120M public company financings

KEVIN CHEN
DIRECTOR

MICHAEL RAPSCH
VICE PRESIDENT, INVESTOR RELATIONS

- 20 years experience in IR, Corporate Communications & Capital Markets
- Former Vice President, Corporate Communications of SilverCrest Metals
- President & Founder of Cologne Communications Corp.

RYAN GOODMAN
DIRECTOR

Silver-Copper-Gold Discoveries Ahead

- Advancing its flagship Thorn Project in BC, Canada
- Advancing its high-grade Langis Silver Project in ON, Canada

Backed By Strategic Investors

- Strategic investment by **BHP**, the world's largest miner

Monetizing Non-Core Projects

- Hog Heaven Project:  **Ivanhoe**
ELECTRIC
- Option to earn 75%
- Atlin Goldfields Project:  **eldorado** gold
- Option to earn 100%

PROJECTS

Advancing exceptional copper, gold and silver projects that fuel global progress, support clean energy, and create lasting value for generations to come.

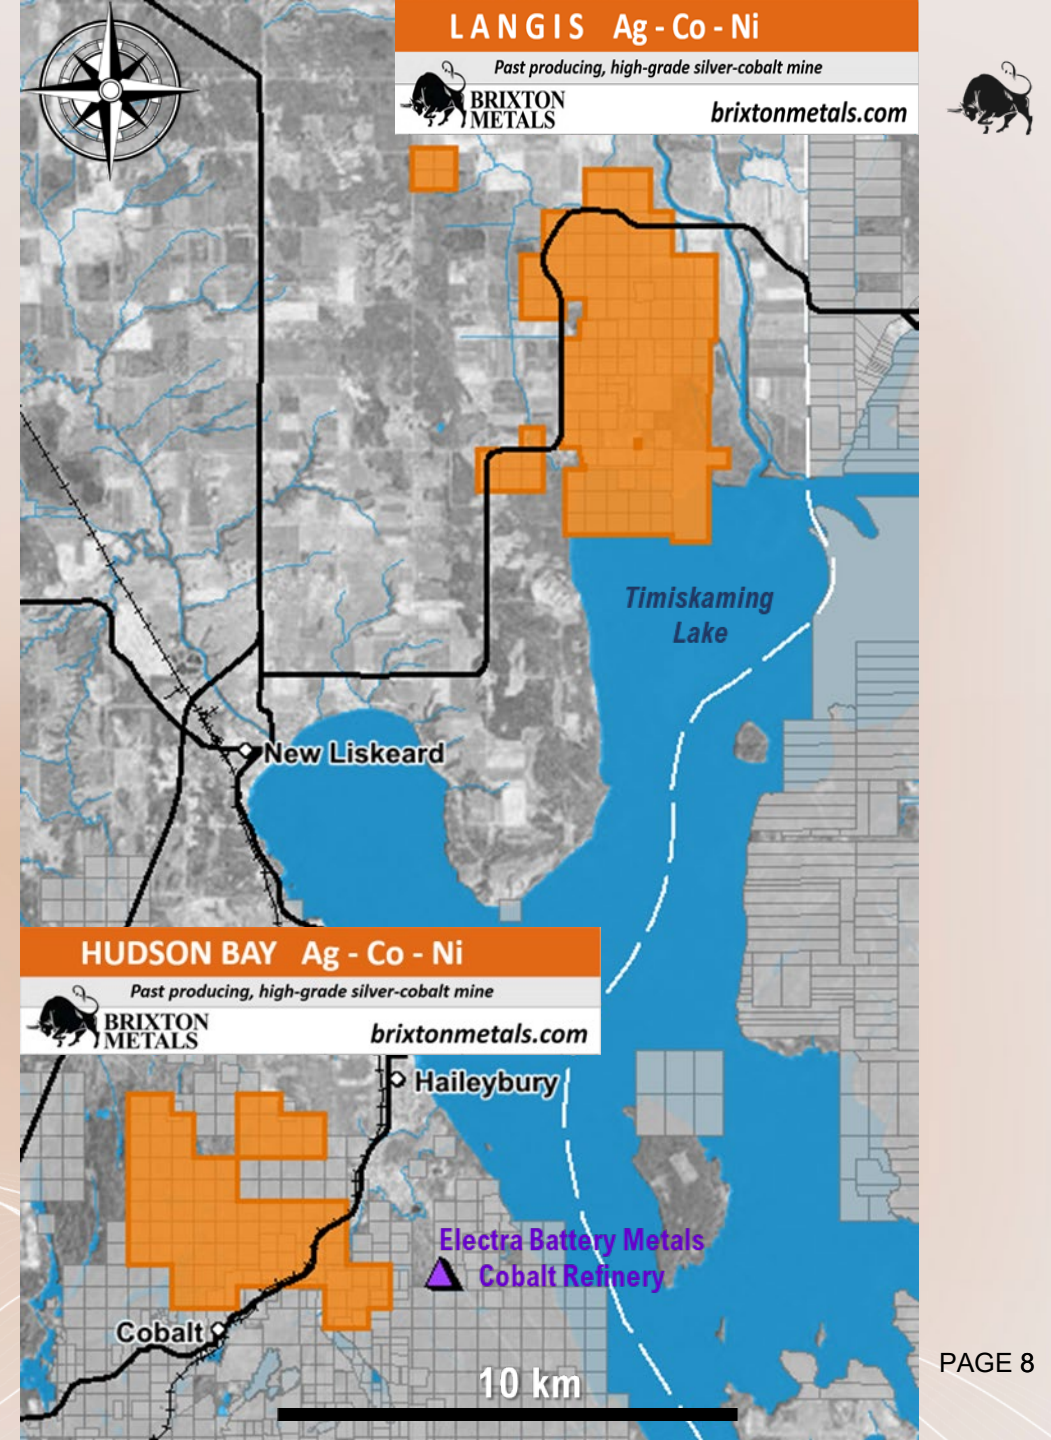

PROJECT LOCATIONS

LANGIS SILVER PROJECT

- Two past producing, high-grade silver mines located 500 km from Toronto, Ontario, Canada
- **LANGIS MINE** past production of 10.4 Moz Ag at **25 opt**
- **HUDSON BAY MINE** past production of 6.4 Moz Ag at **123 opt**
- Langis Mine was in operation from 1908 to 1989; closed in 1990 due to low silver price
- Historic mine recoveries ranged from 88% to 98%
- Over 10 km of underground workings at Langis
- Excellent local infrastructure: year-round road access, power, railway and refinery
- Low-cost drilling

LANGIS SILVER PROJECT – 2026 DRILL PROGRAM

Core from LM-26-289 and LM26-350

LM-26-289 at 172.45.5 m – Cobaltite, silver arsenide and native silver in fine-grained mafic volcanic

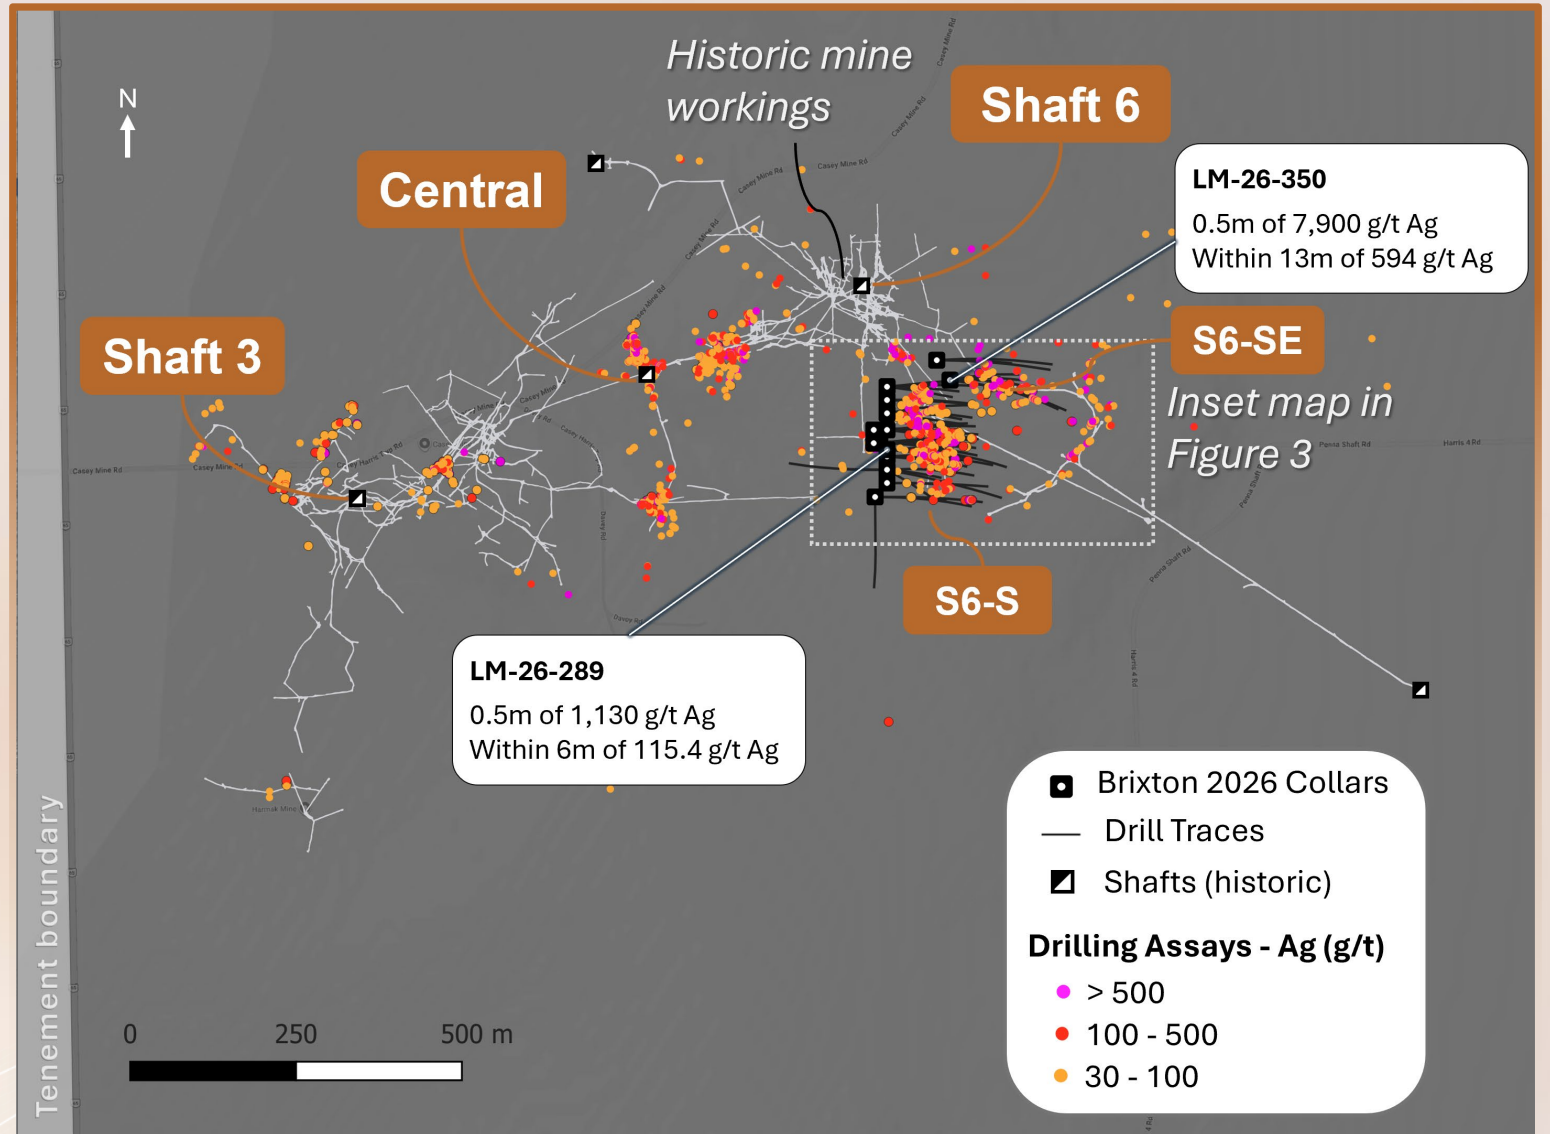

LM-26-350 at 115.25m, displaying native silver (appearing white) as veinlets and blebs.

Core from LM-26-290 at 115.25m

Native Silver

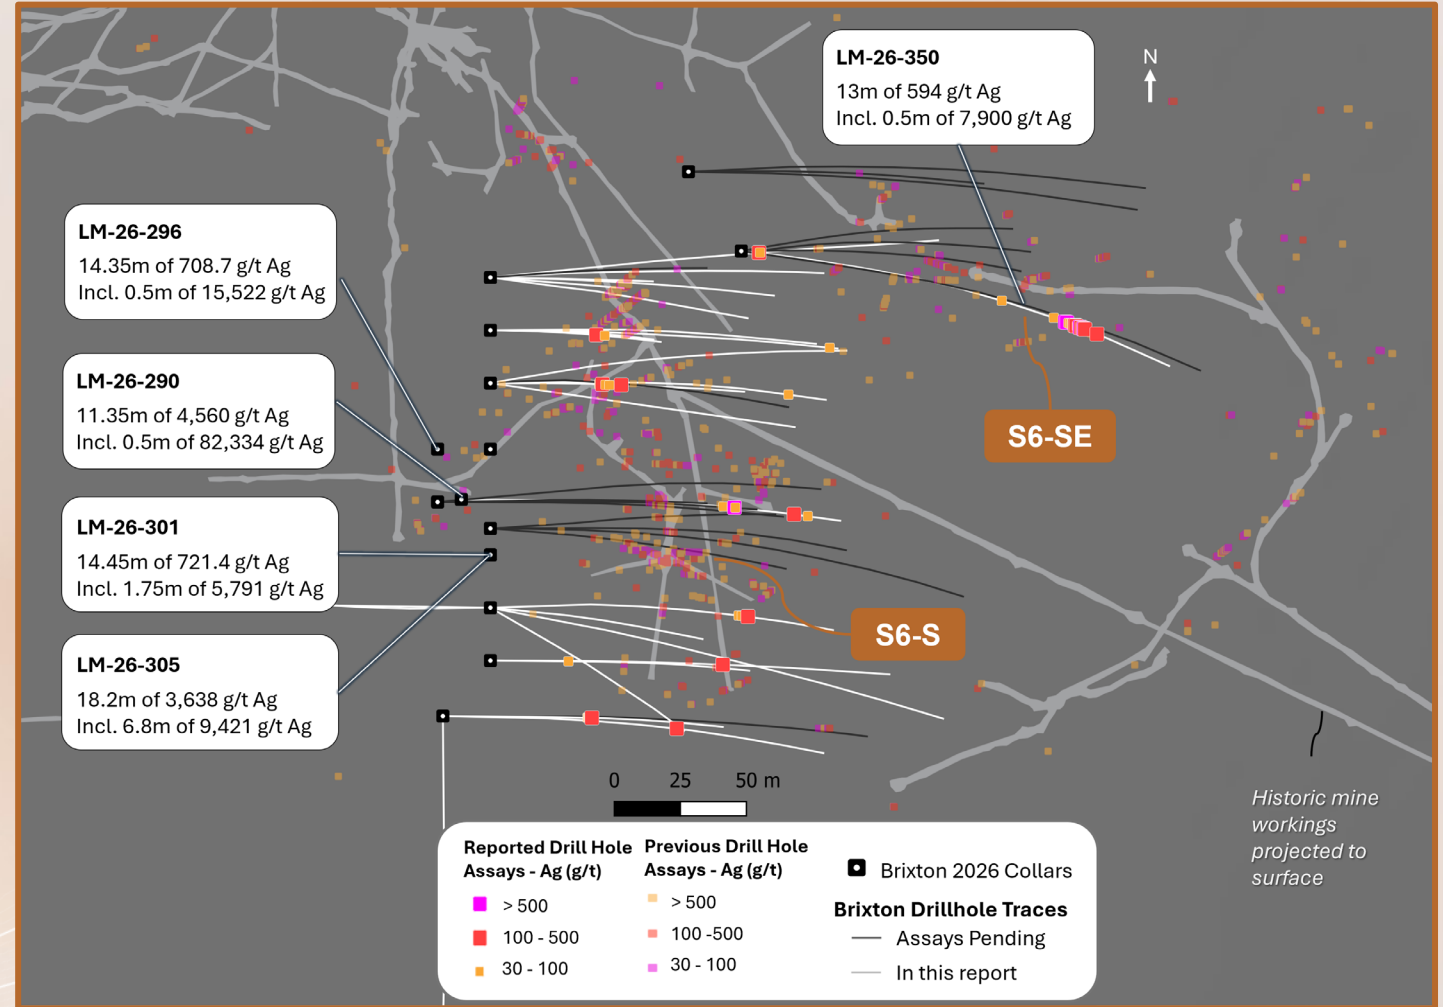

LANGIS SILVER PROJECT – 2026 DRILL PROGRAM

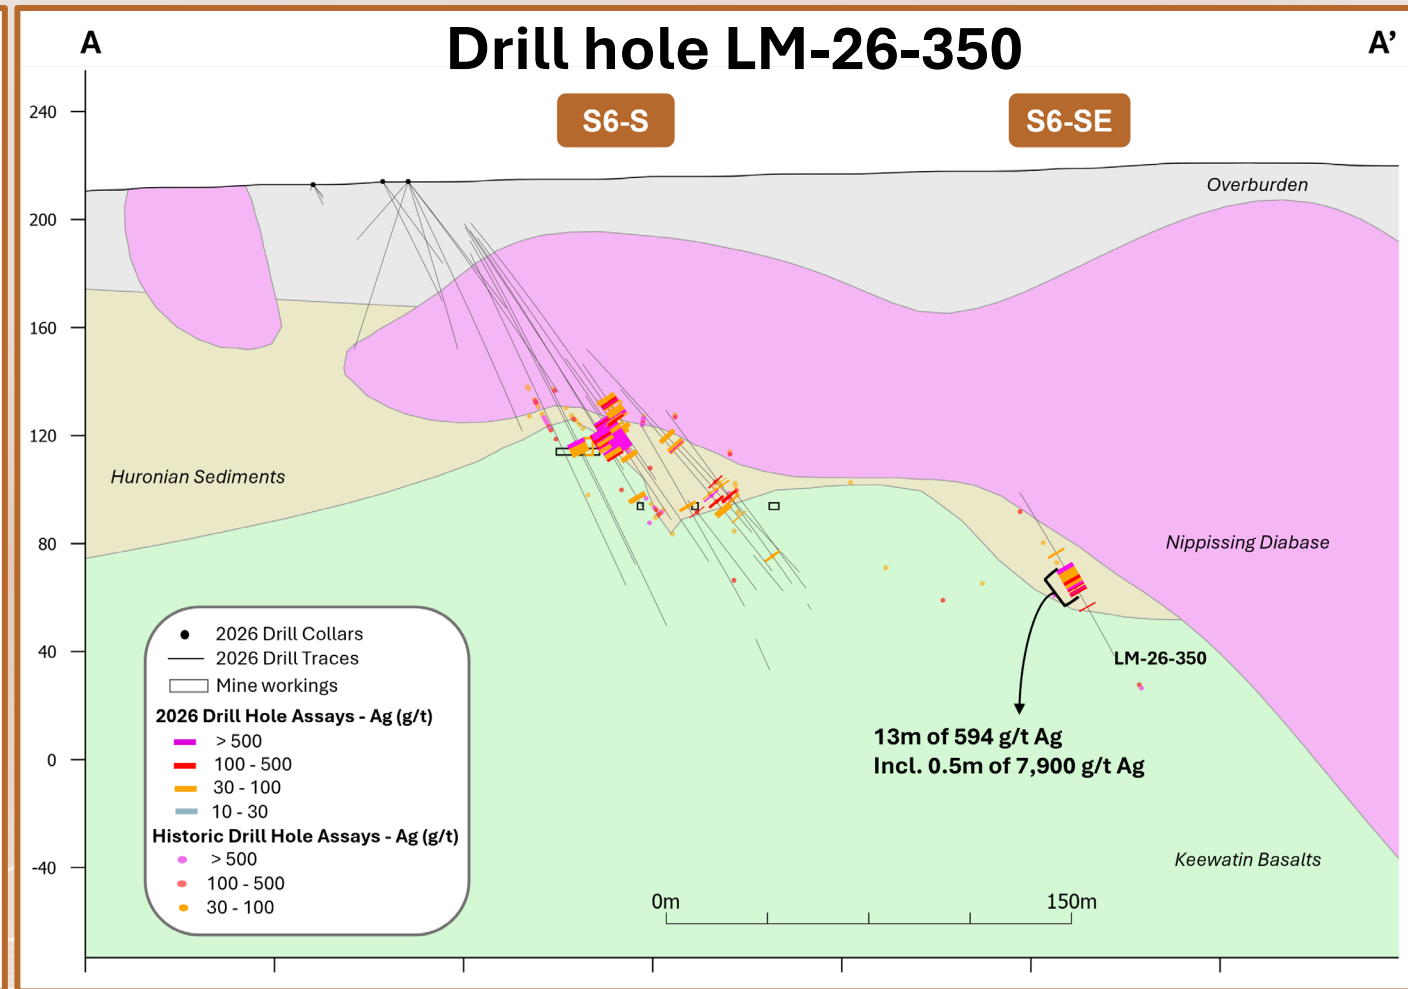

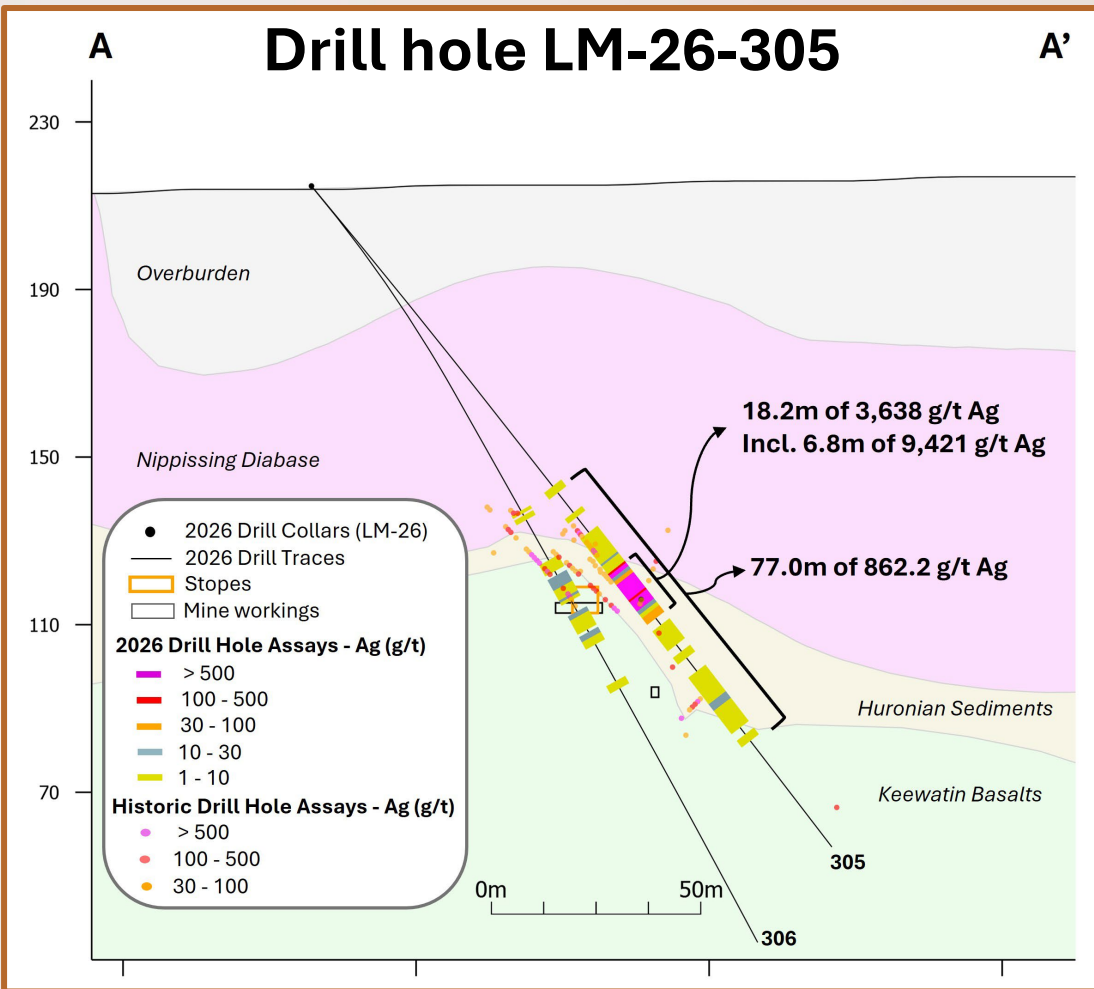

- Ongoing surface drilling of **up to 60,000 metres** toward a maiden mineral resource estimate
- **Exploration Target (*)**: 1-2 MT at 400 g/t to 800 g/t silver
- Explore for new silver mineralization in and around historical workings and drill test new target areas
- Advance the Langis tailings silver recovery through drilling and metallurgical work

(*) Cautionary note: the potential quantity and grade is conceptual in nature and there has been insufficient exploration to define a mineral resource and it is uncertain if further exploration will result in the target being delineated as a mineral resource.

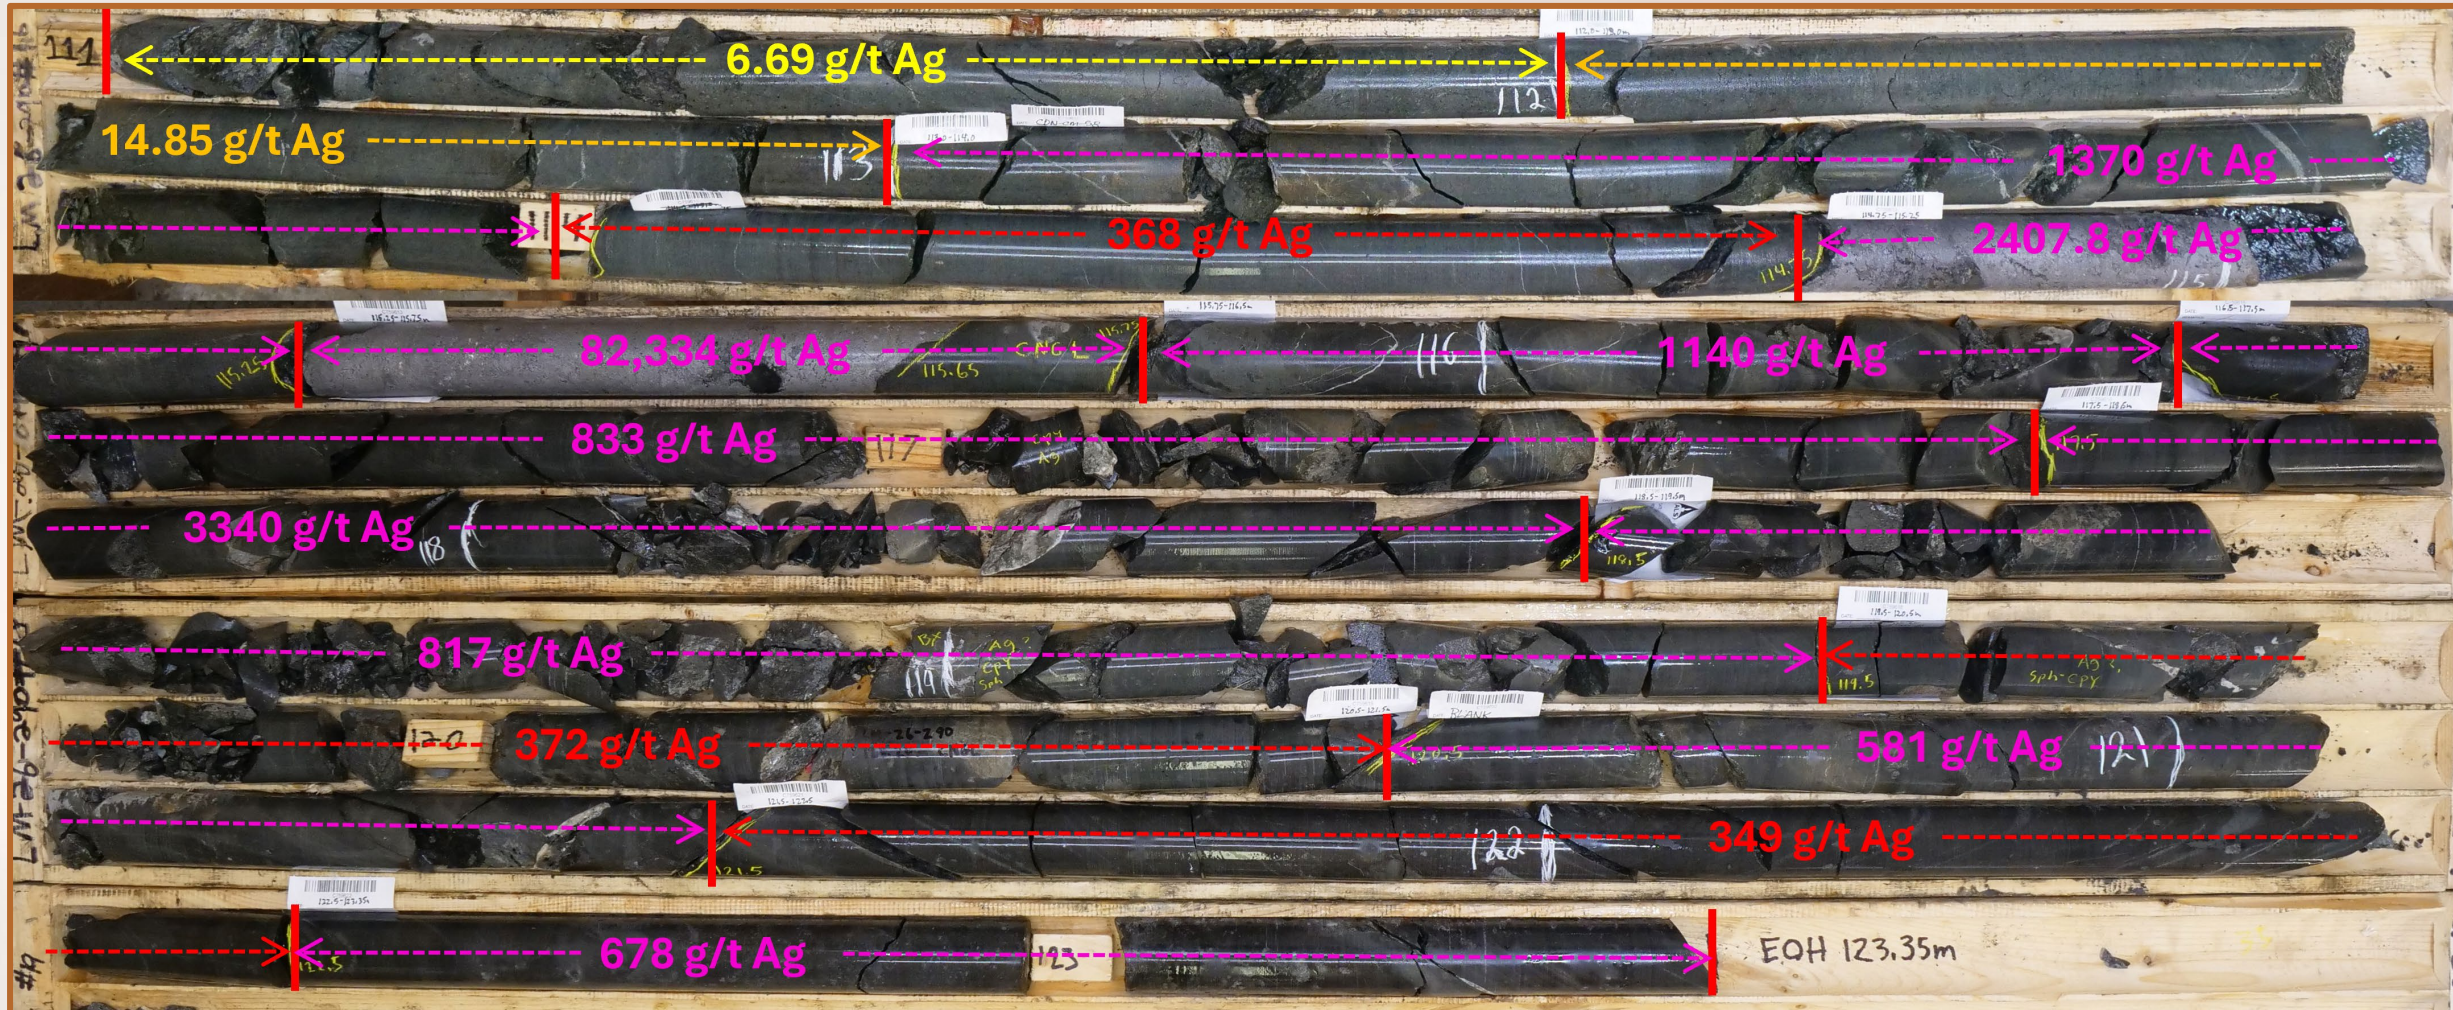

LANGIS SILVER PROJECT – CROSS SECTIONS

LANGIS SILVER PROJECT – DRILL HOLE LM-26-290

(From 111m to end of hole at 123.35m)

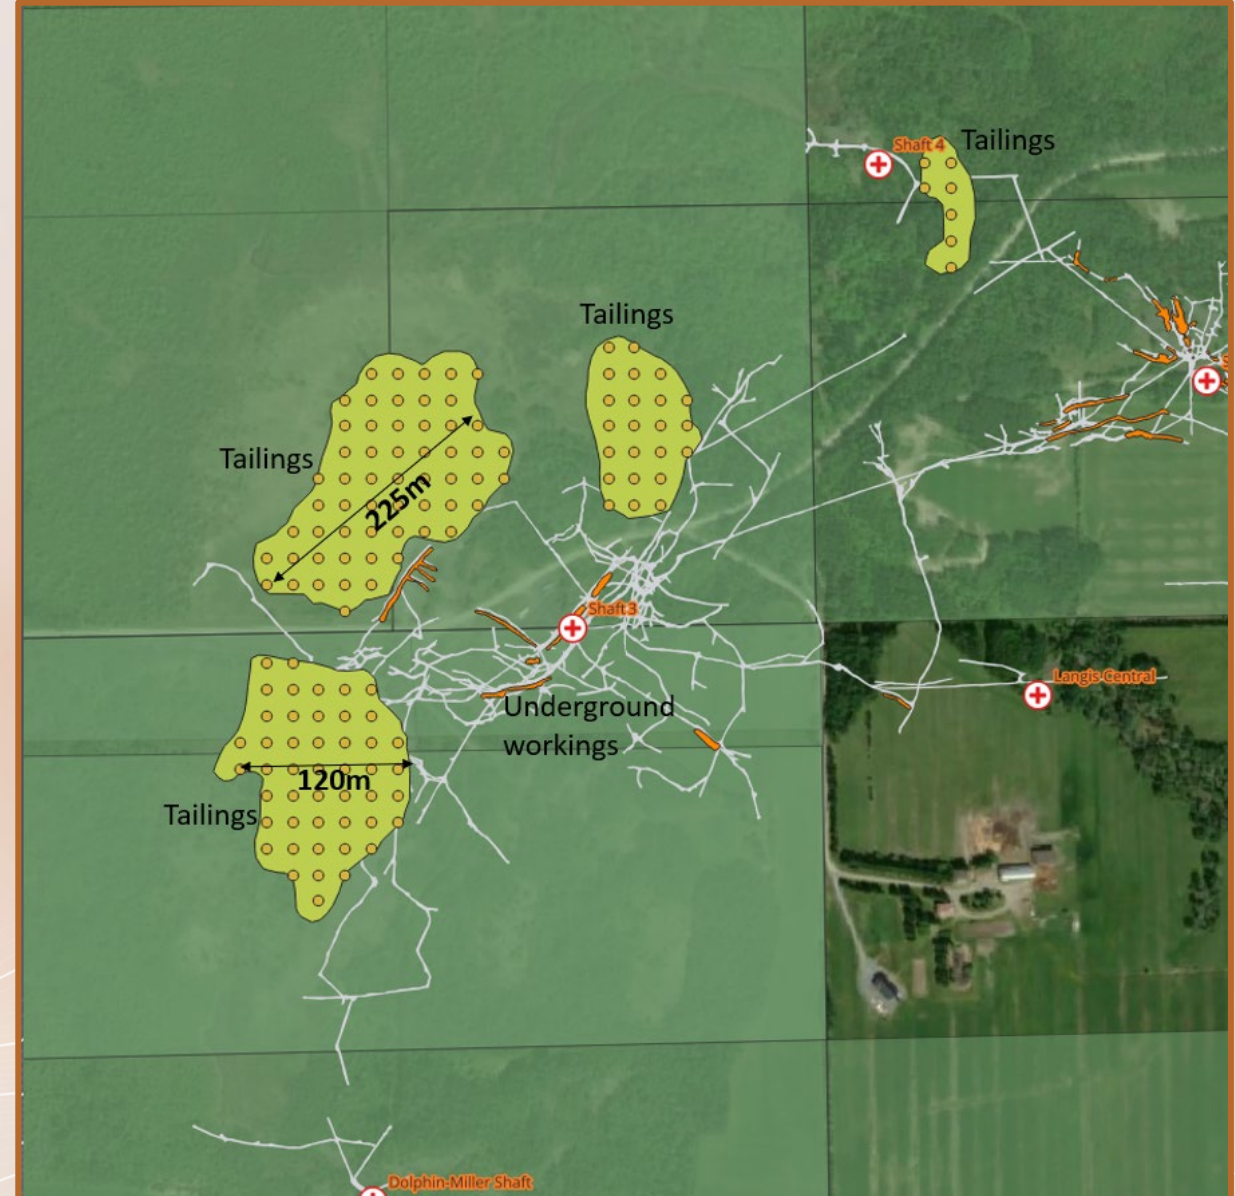

(terminated upon intersecting historic mine working)

LANGIS SILVER PROJECT – TAILINGS RECOVERY WORK PROGRAM

- Drill 25x25m grid for the tailings assessment
- Approx. 402 samples to quantify silver content within the tailings (including grade)
- Commence work program in May, anticipating initial assays by June/July
- Previous grab samples have returned between 1.5 opt to 11 opt silver
- Metallurgical recovery testing planned post drilling
- Area includes road access and 3-phase power on private patents

LANGIS SILVER PROJECT – PREVIOUS DRILLING HIGHLIGHTS

Previously significant drilling highlights, 2016-2022

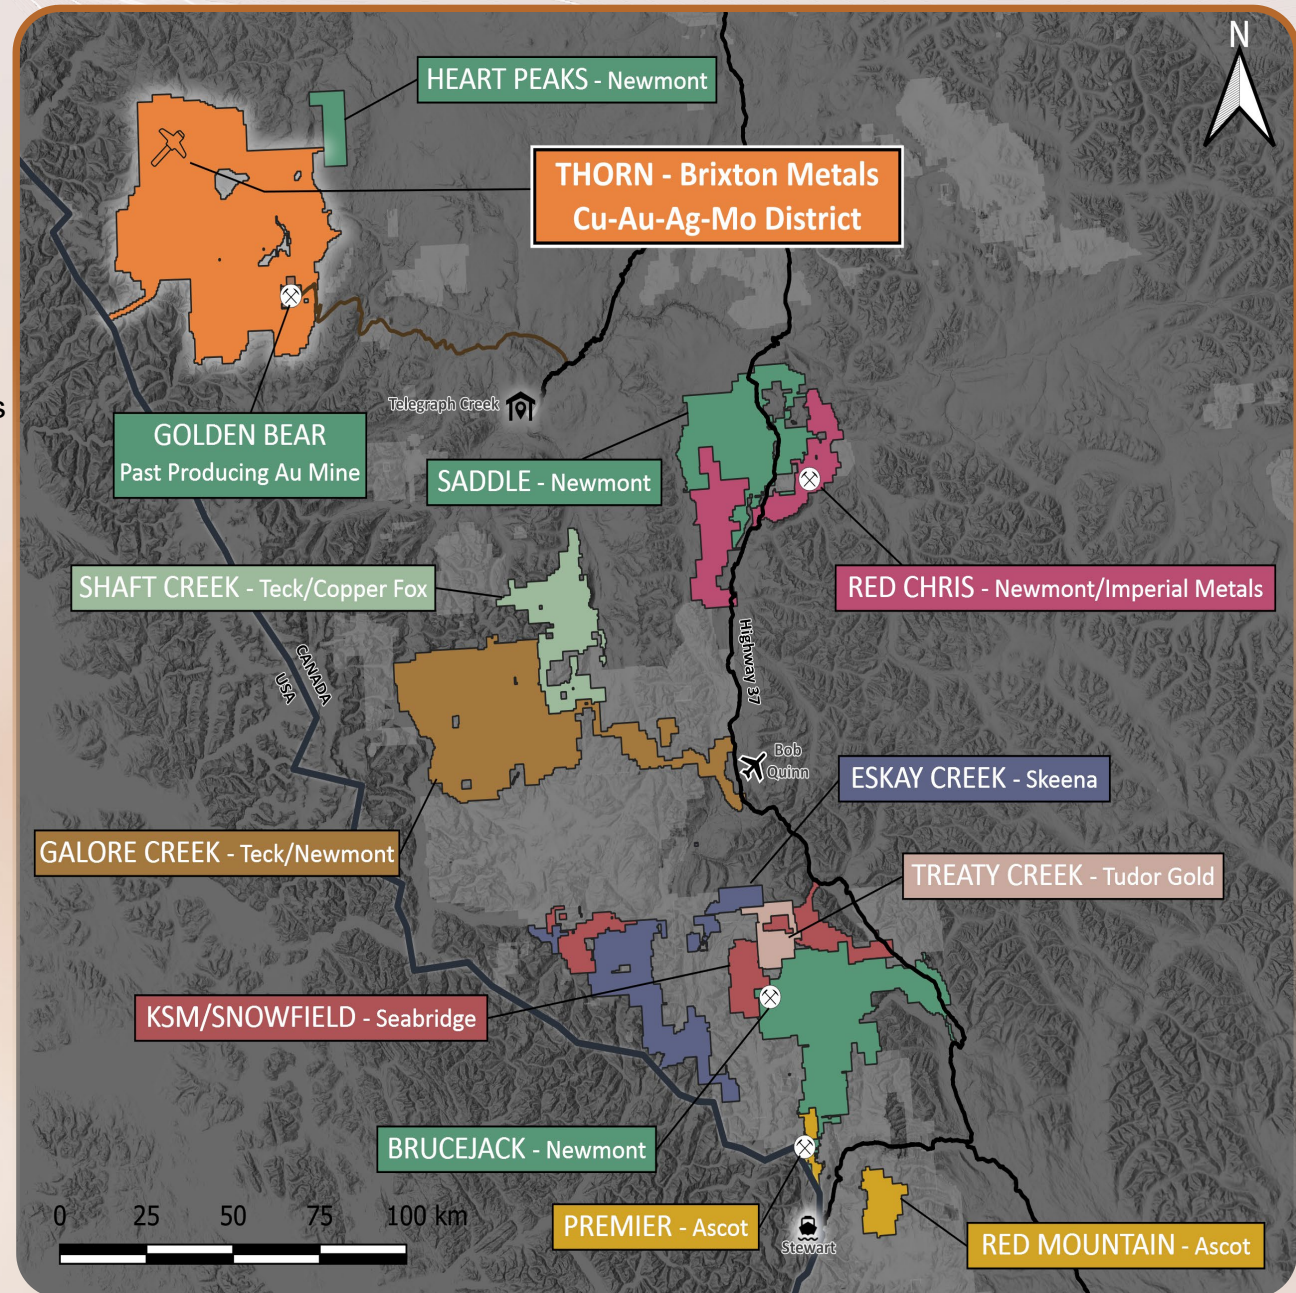

Area	Hole ID	From meter	To meter	Interval meter	Silver g/t
Shaft 3	LM-18-042	13.00	24.00	11.00	2592.88
	including	19.00	23.00	4.00	7018.75
Shaft 3	LM-20-083	6.00	24.00	18.00	363.21
	including	11.00	17.00	6.00	1078.82
Shaft 3	LM-20-133	16.60	33.60	17.00	970.46
	including	16.60	27.60	11.00	1289.00
	including	30.60	31.60	1.00	1500.00
Shaft 3	LM-20-131	8.90	33.90	25.00	282.70
	including	8.90	14.90	6.00	1115.02
	LM-18-044	9.00	22.00	13.00	504.52
	including	12.00	18.00	6.00	1031.75
Central	LM-22-283	163.50	190.50	27.00	348.53
	including	165.00	174.00	9.00	1037.43
Shaft 6	LM-18-016	149.00	166.60	17.60	1251.18
	including	159.56	160.56	1.00	15436.00
Shaft 6	LM-16-003	179.41	188.51	9.10	720.40
	including	179.41	185.47	6.06	1007.07
Shaft 6	LM-18-039	183.10	195.00	11.90	536.63
	including	187.10	192.00	4.90	1155.14
Shaft 6	LM-21-219	117.80	188.80	71.00	120.91
	including	135.80	139.80	4.00	1186.00
	including	141.80	142.80	1.00	1490.00

- Brixton has collared 288 holes and drilled 40,315 between 2016 and 2022
- Drilling has intersected more than 220 intervals of >100 g/t silver
- Other drilling highlights yielded 15 intercepts greater than 1,000 g/t silver in the Shaft 3 area, and 10 intercepts greater than 1,000 g/t silver in the Shaft 6 area

THORN PROJECT

The Flagship wholly owned.

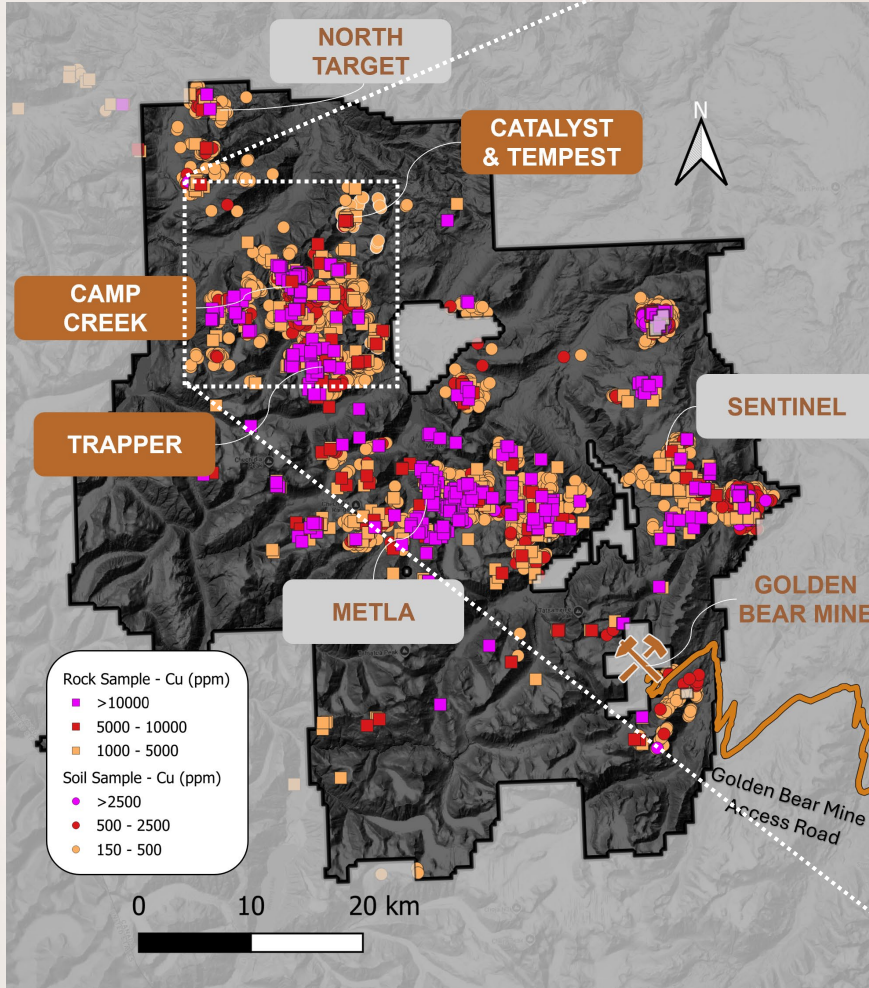

- Located **on trend** with BC's prolific **Golden Triangle**
- In partnership with the Taku River Tlingit and Tahltan First Nations
- **Easy access** via 45-minute flight from Whitehorse, YT
- A massive **2,945km² claim block**
- Potential access to US tide waters
- Golden Bear mine road to Hwy 37
- **District-scale** project with many large exploration targets:
 - Calc-Alkalic Cu-Au-Ag-Mo Porphyry
 - Alkalic Cu-Au Porphyry
 - Epithermal Au-Ag
 - Volcanic & Sediment hosted Au-Ag

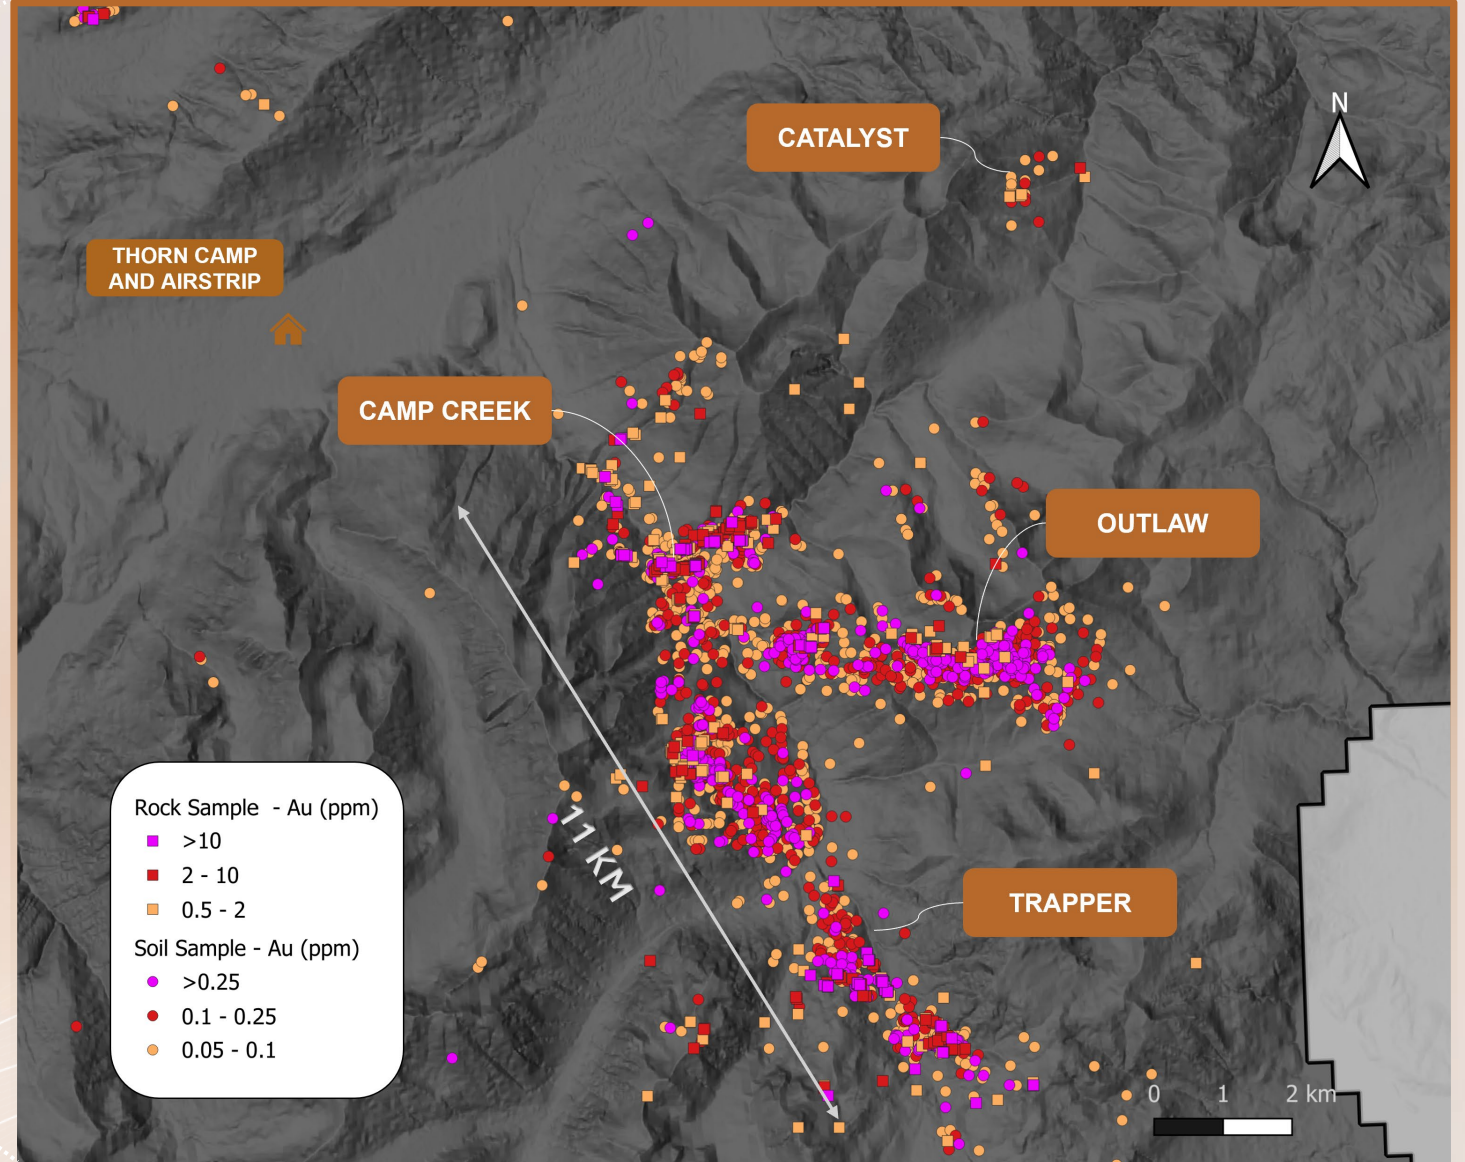

THORN GEOCHEMISTRY FOOTPRINT

Copper Geochemistry

Gold Geochemistry

TRAPPER DRILLING, SAMPLING & TARGET AREAS

A 4km gold in soils anomaly outlines the Trapper Gold Target

Drilling has been focused in the central and southeast areas

TRAPPER GOLD TARGET

Gold mineralization is associated with base metal veins (BMS)

Highest grade gold mineralization is at or near the diorite-volcanic contact

Visible Gold Hosted in BMS vein

THN22-205 @ 151.75m of 249 g/t Au over 0.25m

TRAPPER VISIBLE GOLD IN DRILL CORE

Highest grade gold mineralization is at or near the diorite-volcanic contact

Visible Gold Hosted in BMS vein

THN25-361 @ 112.20m of 112 g/t Au over 0.5m

Visible Gold Hosted In Diorite

THN22-205 @ 151.75m of 249 g/t Au over 0.25m

Visible Gold Hosted In Diorite

THN22-237 @ 159.78m of 34.5 g/t Au over 0.38m

Visible Gold Hosted In Diorite

THN22-206 @ 60.18m of 8.96 g/t Au over 0.25m

Visible Gold Hosted In Diorite

THN22-255 @ 61.77m of 15.45 g/t Au over 0.30m

Visible Gold In Base Metal Vein

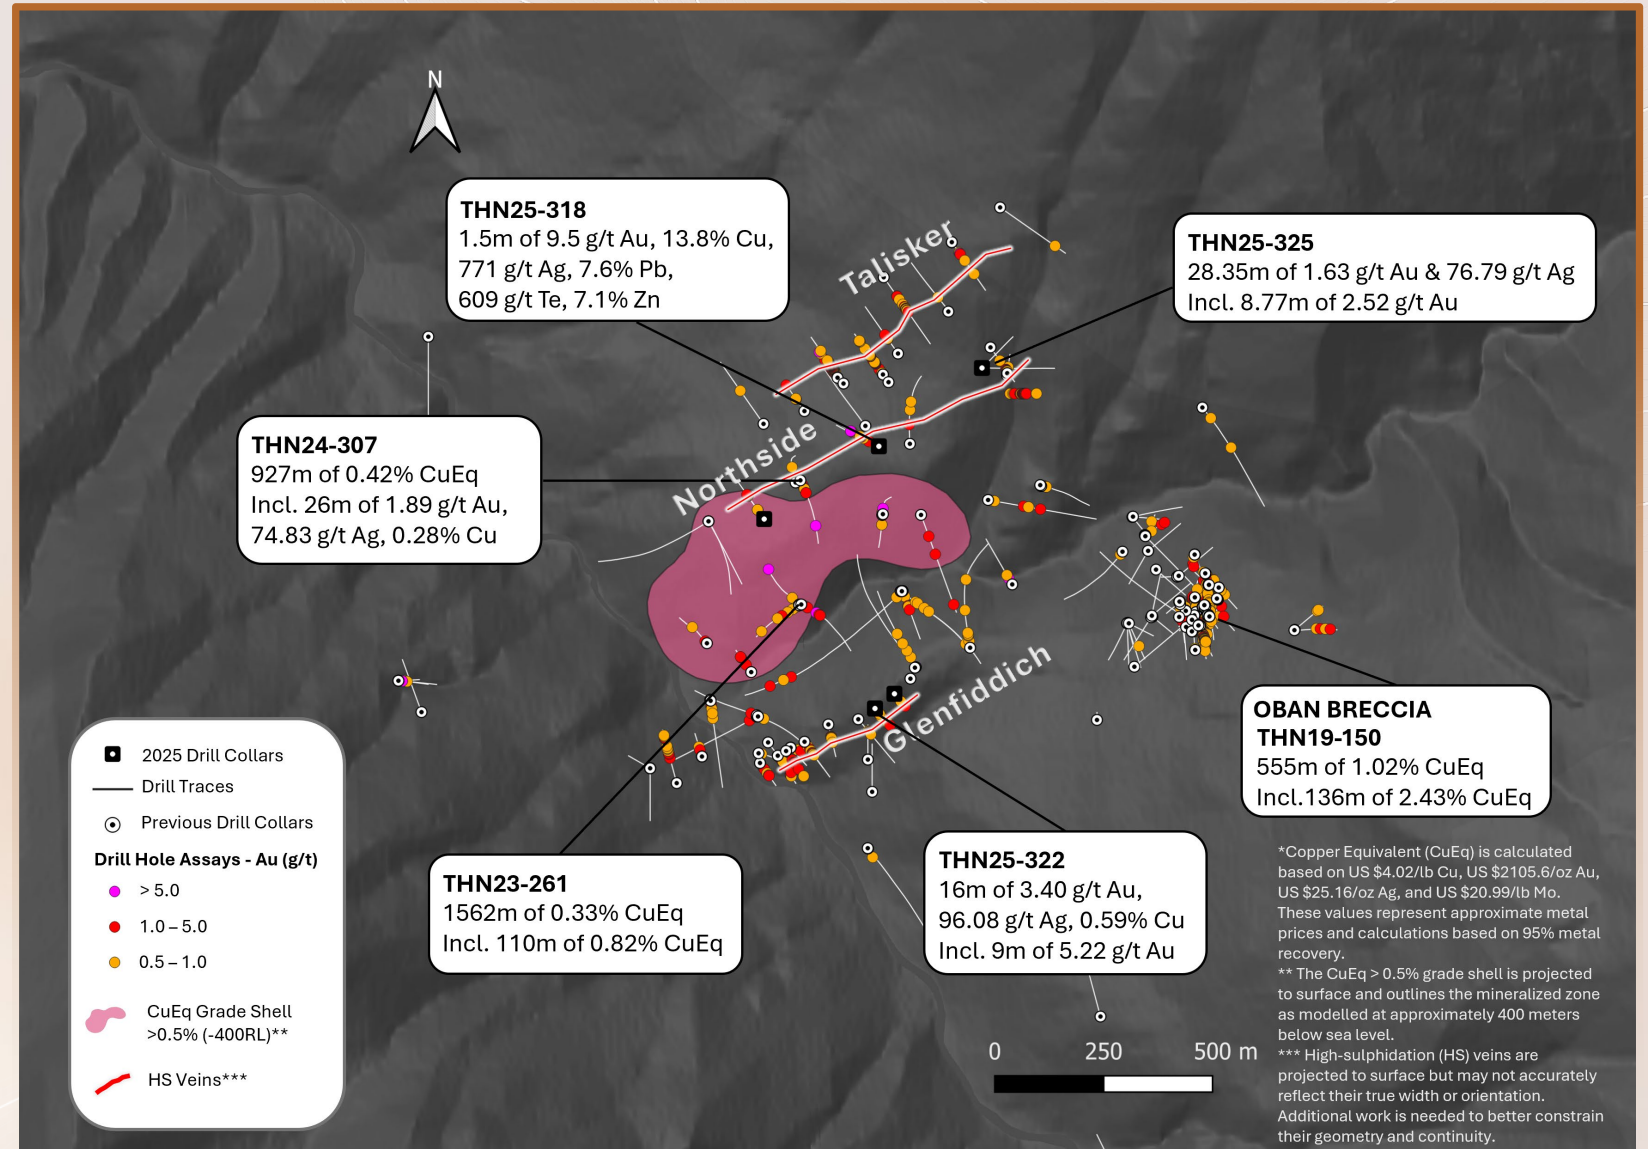

THN22-208 @ 23.51m of 40.6 g/t Au over 0.25m

CAMP CREEK HIGH SULPHIDATION TARGETS & DRILLING

Camp Creek High Sulphidation, Near Surface Veins

- During 2025 campaign: Newly identified northeast structural trend, “Northside vein” and extension of known “Glenfiddich vein”
- Hole **THN25-318** intercepted 1.5m of 9.5 g/t gold, 13.8% copper, 771 g/t silver, 7.6% lead, 609 g/t tellurium, 7.1% zinc from 165.5m depth

CAMP CREEK PORPHYRY DRILLING HIGHLIGHTS

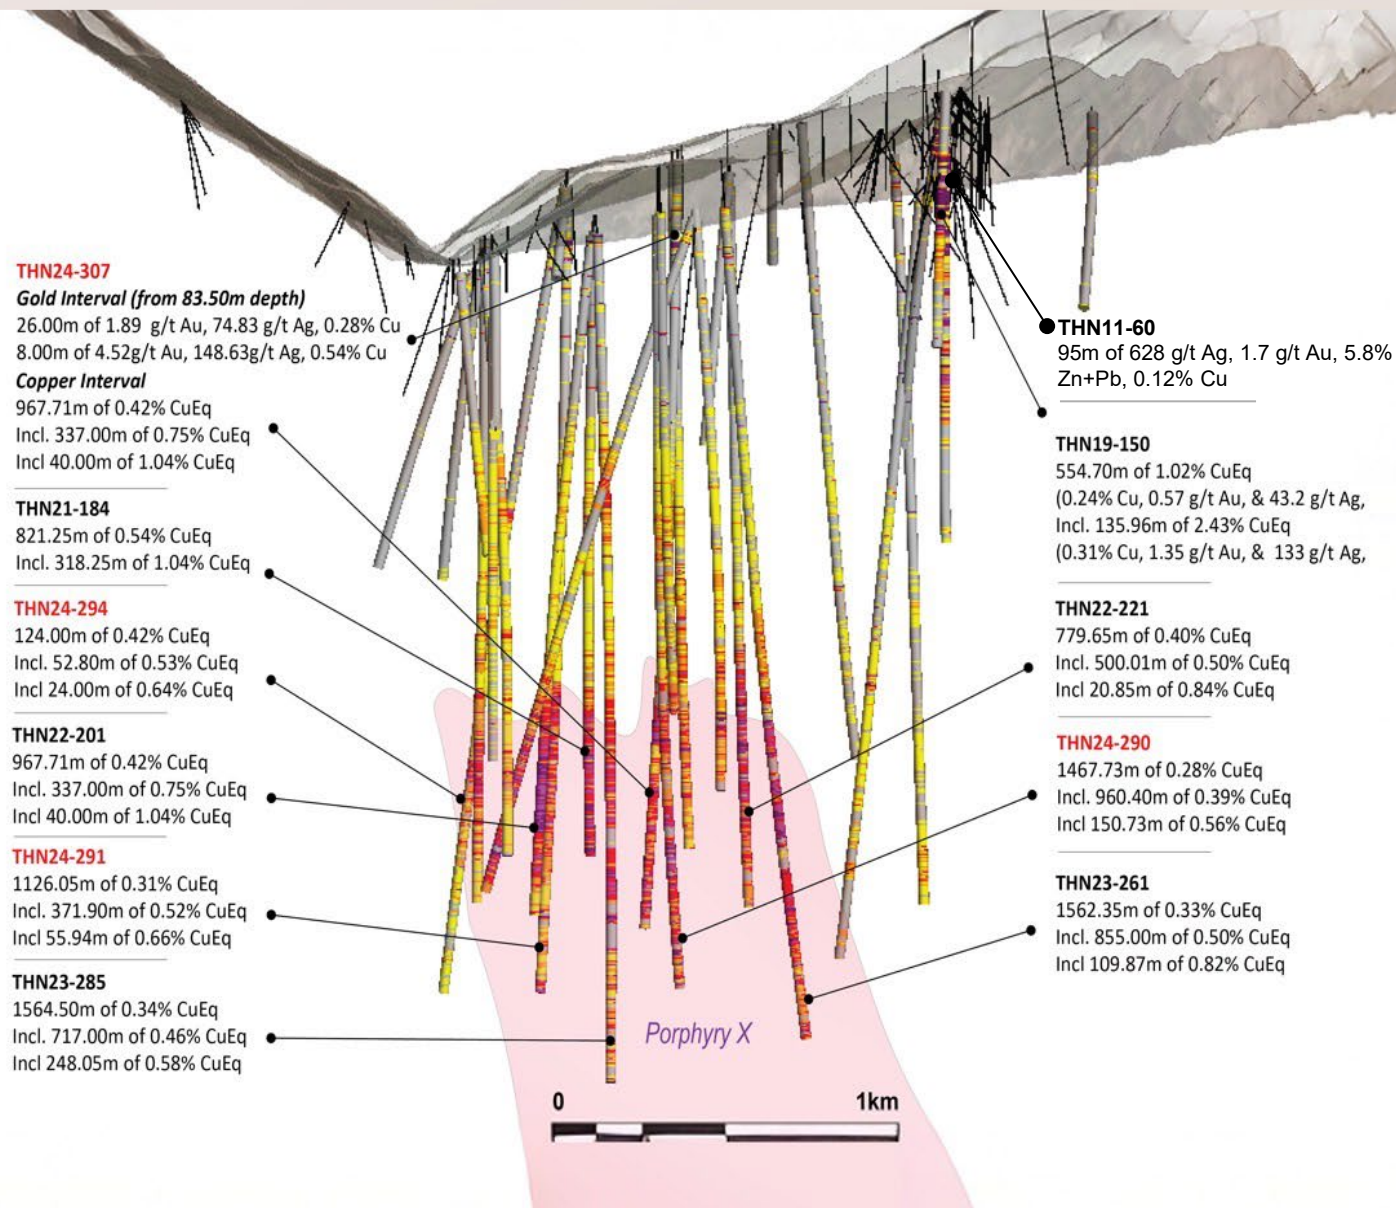

A 2021 blind discovery

Copper Equivalent (CuEq) is calculated based on US\$ 4.02/lb Cu, US\$ 2105.6/oz Au, US\$ 25.16/oz Ag, \$US 20.99/lb Mo. These prices represent the approximate metal prices and calculations assume 95% metal recoveries.

$$\text{CuEq \%} = (\text{Cu \%} + (0.764486 * \text{Au g/t}) + (0.009134 * \text{Ag g/t}) + (0.000523 * \text{Mo ppm})) * 0.95$$

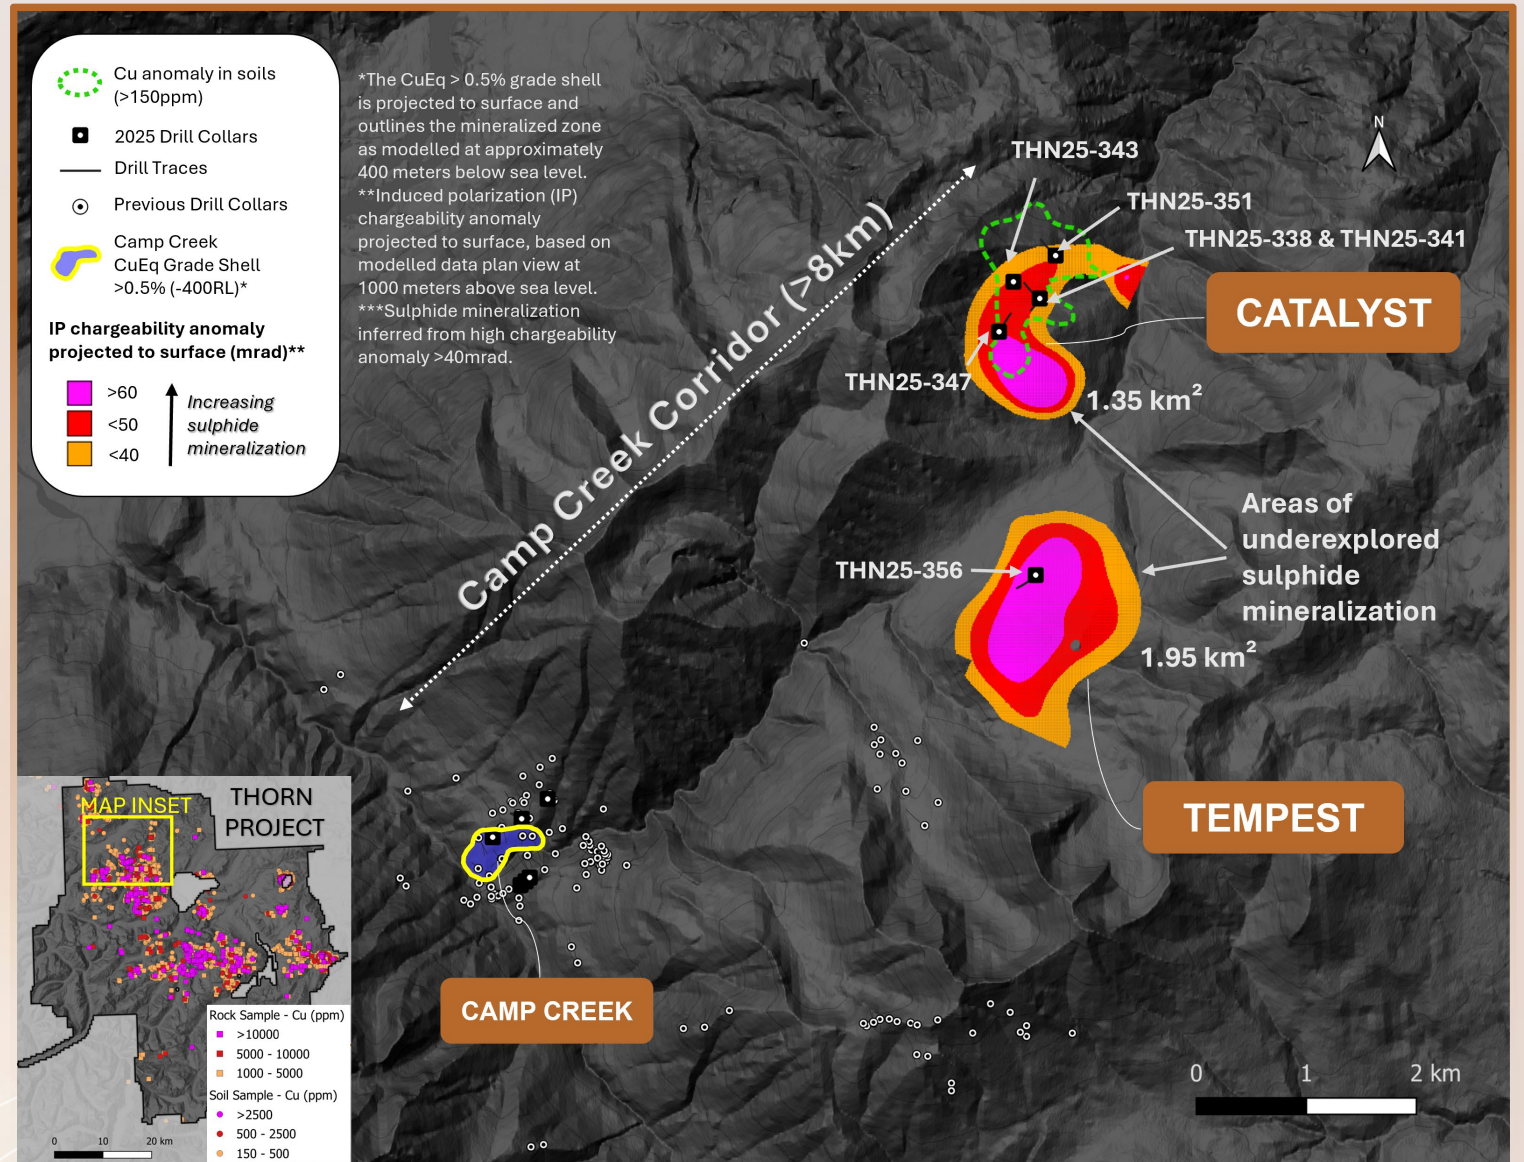

CATALYST & TEMPEST – NEW DISCOVERIES 2025

Catalyst Porphyry Target is located approx. 6 km northeast from the Camp Creek Porphyry system

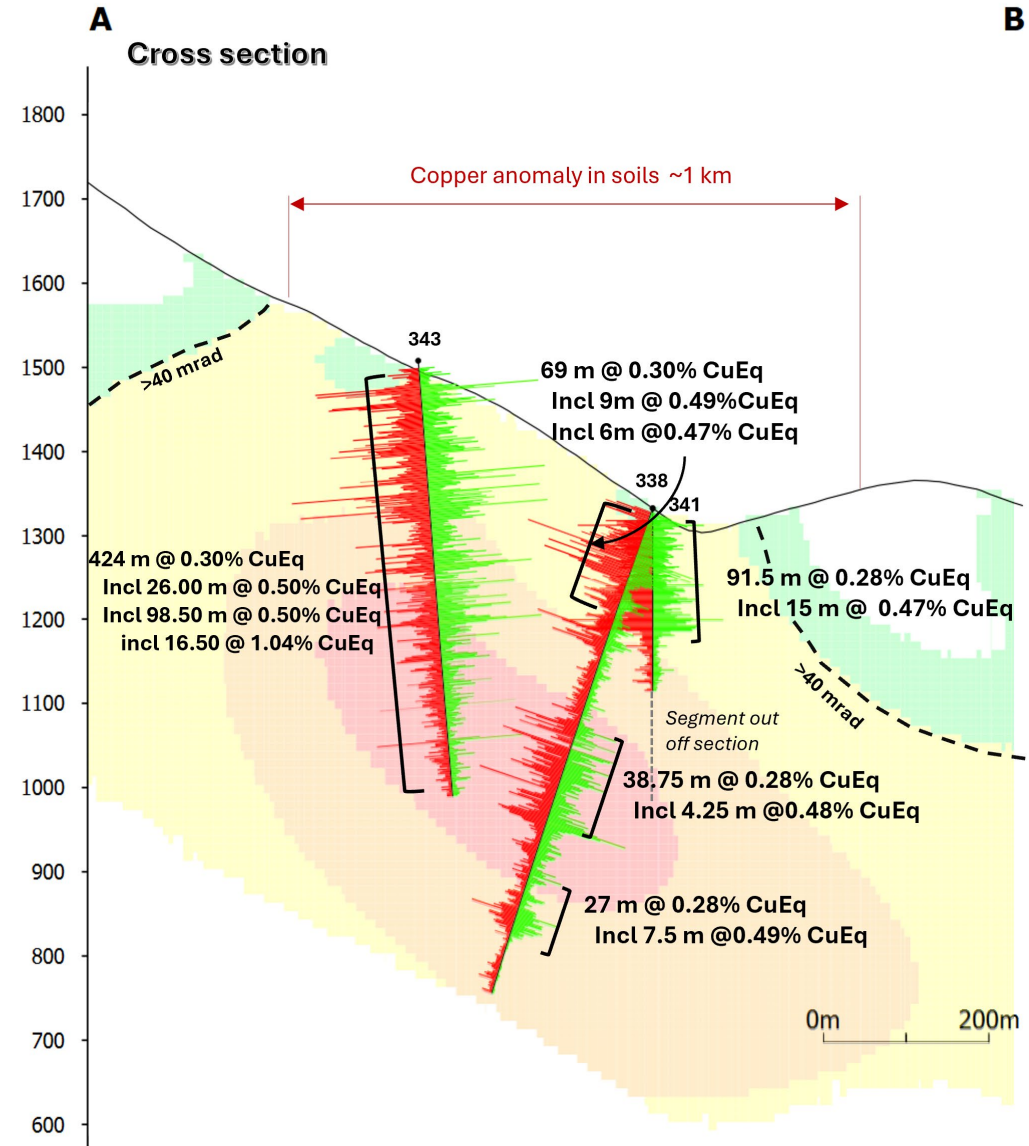

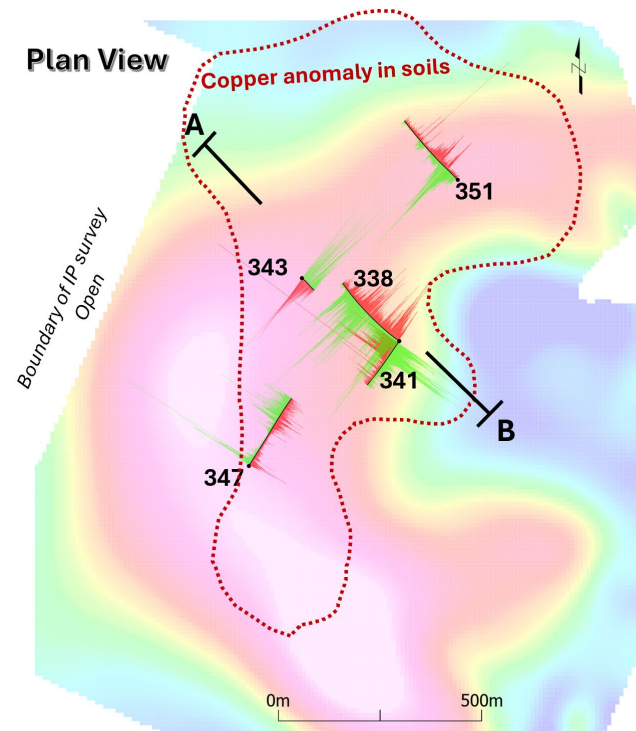

- During 2025 campaign five holes were drilled at **Catalyst** confirming a broad hydrothermal system with porphyry-style alteration and veining
- Hole **THN25-343** intercepted 16.5m of 1.05% CuEq, including 98.5m of 0.50% CuEq, including 26m of 0.50% CuEq all within **434m of 0.30% CuEq**

CATALYST – NEW DISCOVERY 2025

- The new copper-gold porphyry discovery identified mineralization from surface combined with a large geochemical and geophysical footprint
- Copper/Gold 1/1 ratio
- Mineralization remains open in multiple directions: room for expansion and higher grades
- B-A veins with Maricunga-style veins

BC'S PREMIER PORPHYRY TARGET

Fully funded for drilling to target high-potential copper and gold discoveries along an 80-km megatrend. Drilling to commence in May.

WORLD'S LARGEST MINER, BHP INVESTED

A strategic investment from the world's largest mining company validates the strength of our copper-gold porphyry assets and positions us for accelerated growth and discovery.

ONGOING DRILL PROGRAM AT LANGIS IN ONTARIO

Extensive drill program underway, continuing strong momentum through steady news flow in the weeks and months ahead.

TRUSTED BY THE MAJORS

Hog Heaven optioned to Ivanhoe Electric and Atlin Goldfields optioned to Eldorado Gold, with both partners funding exploration (incl. drilling in 2026) and cash to Brixton.

MONETIZATION OF NON-CORE ASSETS

HOG HEAVEN (Montana) – Optioned to Ivanhoe Electric Inc (“IE”) Copper-Gold-Silver

- IE can earn 75% by meeting the following earn-in obligations: USD \$4.5M cash and \$40M in work over 11 years
- To date, USD\$ 3.5M cash payments to BBB made, and ~\$19M spent on Project
- Residual cash payments to BBB a non-dilutive contribution towards G&A
- 2026 Drill Program concluded; awaiting results

ATLIN GOLDFIELDS (BC) Optioned to Eldorado Gold (“ELD”)

- ELD can earn 100% by meeting the following earn-in obligations: C\$1.1M cash and \$5.35M in work over 5 years
- At end of option period, ELD right to exercise the option to acquire 100% ownership for C\$7M cash
- During option period, Brixton the Operator with ELD funding exploration
- 2026 Drill Program underway
